Berlin-based Atomic Fruit combines dreamy, psychedelic rock with electronic beats and immersive soundscapes. With members from Sweden, France and Italy, the group formed in 2021 after a serendipitous meeting at a SUUNS concert and their energetic live shows quickly became a frequent spectacle in the Berlin underground scene.

Their 2023 debut vinyl *Play Dough* introduced their eclectic mix of synthesizers, guitars, trumpet and samples to an international audience as songs from the album landed on editorial playlists in Spotify, Apple Music and Tidal and saw airplay on Berlin radio stations.

The attention to sonic nuances and genre-bending character of the songs, along with beautifully structured melodies will definitely appeal to fans of "alt-j" and "Radiohead". However, the band's approach to songwriting itself is unique and escapes easy comparisons. – Loudness Blog

In 2024, they returned to self-produce their sophomore album *Sketches of the Moon*, showcasing a more organic, introspective side of the band. Drawing inspiration from desert blues, noise and the soundtracks of David Lynch, the album blends pitch-shifted vocals, reverberant baritone guitars and further experiments with samples and electro acoustic effects.

Released in February 2025, *Sketches of the Moon* reflects upon the absurdity of life, where each moment seems eternal as we experience it, while the past feels like a surreal, fading dream. Following the release show in Badehaus Berlin, the album quickly attracted popularity on streaming platforms, amassing over 80 000 streams in the first month, as the band performed live on [RadioEins](#) and toured across Germany and France.
